The editors welcome discussion of *PCI Journal* content. Comments must be confined to the scope of the article under discussion. All discussion of articles in this issue must be received by April 1, 2012.

Please address reader comments to *PCI Journal* at journal@pci.org.

Letters should include the writer's name, title, company, city, and email address or phone number and may be sent to the respective authors for comment. All letters become the property of *PCI Journal* and may be edited for space, clarity, and style.

Naaman sends thanks for Distinguished Educator Award

Since I was told that there will be no time for acknowledgments and thanks during the PCI awards presentation in Salt Lake City, I would like to present my sincere appreciation and thanks to the members of the PCI Student Education Committee and the Precast/Prestressed Concrete Institute for selecting me for this award. When I adopted prestressed concrete as a main topic for my research and teaching more than four decades ago, I did not expect the satisfaction and technical fulfillment it would provide. It has been a wonderful subject, still humming in my heart and in my brain. I truly consider the PCI Distinguished Educator Award to be the crowning for my career, and I hope that my example will entice the younger generation of educators to keep working in and advancing our knowledge of this wonderful structural material that is prestressed concrete.

Thank you.

Antoine E. Naaman, PhD, FPCI
Professor Emeritus, Department of Civil and Environmental Engineering, College of Engineering, University of Michigan, Ann Arbor, Mich.
