

Volume 56, 2011

Following is an index of all reports, papers, design-construction articles, and discussions that have appeared in the *PCI Journal* during the past year. This index is the 20th supplement to the *PCI Journal* 10-year and 25-year indexes, which comprehensively reference all reports, articles, and discussions published in the *Journal* from V. 1, No. 1, May 1956 to V. 36, No. 6, November–December 1991. Some back articles are available for download from the PCI website at www.pci.org/publications/journal.

Listed first is the author index, which includes, in alphabetical order, the names of contributing authors for 2011, followed by the title, volume, number, date of publication, and page numbers for each report, article, or discussion. The material is then classified in chronological order under various subject categories.

Some recent back issues of the *PCI Journal* are still available. Copies of articles can be obtained for cost of reproduction.
