Metromont Corp., Greenville, South Carolina

**“Casting conduit, electrical boxes, and mechanical boxes into the wall panels makes this project truly unique...”**

## JURY COMMENTS

*“The all-precast structural framing and exterior envelope contain a great variety of precast concrete elements woven into a beautifully designed exterior. The architectural precast concrete certainly allowed design creativity that blends the exterior with the downtown area. This is an economical, speedy solution to a challenging list of owner demands. Casting conduit, electrical boxes, and mechanical boxes into the wall panels makes this project truly unique and gives total precast concrete solutions even more new benefits and advantages.”*
