## Coming ahead

### Design

- Validation of prestressed concrete high-fidelity finite element analysis
- Analysis of out-of-plane performance of composite slab with precast concrete ribbed panels under hanging loading conditions
- Seismic design of precast concrete rocking wall systems with varying hysteretic damping

### Also

- Shear strengthening of prestressed concrete hollow-core slabs using externally bonded carbon-fiber-reinforced polymer sheets
- Precast-to-precast concrete facade joints using precompressed expandable foam
- Meet Chuck Magnesio
