

Force to retire from Tindall after 36 years on the job

Greg Force, chief executive officer of Tindall Corp., is set to retire after 36 years of service.

“Over the past 36 years, Force has been instrumental to the success of Tindall,” says Willy Lowndes, chairman of Tindall. “His vision and leadership have brought the company to where it is today. We honor his excellent service to our team and celebrate the legacy that Greg will leave behind.”

Force graduated from Lehigh University with a bachelor’s degree in civil engineering and later obtained an MBA from Georgia College and State University in Milledgeville, Ga. Force is a registered professional engineer in 10 states and has held positions in engineering, sales, operations, and project management prior to his executive assignments.

Joining Tindall in 1988 as chief engineer at the newly formed Tindall Concrete Virginia Inc. (now the Virginia Division of Tindall Corp.), Force was promoted to vice president and general manager of the division in 1998. He transferred to corporate in 2004 as president and chief operating officer, a position he held for fourteen years before becoming CEO in 2018. Force is a PCI Fellow and Titan.

Cheryl Lang’s role will be expanded to President and CEO on July 1, 2024.

By combining the high-end architectural precast capabilities of International Concrete Products and Mid-States Concrete’s expertise in structural precast solutions, the combined company will provide its customers with new opportunities for total-precast concrete building solutions. The acquisition of Architectural Precast Inc. adds a second Wisconsin manufacturing location to Mid-States, which has its production facility in South Beloit, Ill.

Felsingers retires from Wells

Wells has announced the retirement of Phyllis Felsingers from its executive team, where she served as senior vice president of EH&S and DOT Compliance. Felsingers oversaw companywide strategic leadership of employee safety, environmental, health, and department of transportation compliance programs.

Felsingers leads a team of seasoned safety professionals who educate and coach Wells team members on safety and health policies and procedures, oversee workers’ compensation benefits, and ensure incidents are reported and investigated as required and appropriate.

Under Felsingers’ leadership, a heightened focus was placed on increased safety communication and awareness with behavioral-based observations including reporting of near misses and inspections as well as the formation of operations-based safety committees, educational toolbox talks, safety alerts, and enhanced tracking of safety metrics. Throughout Felsingers’ tenure, Wells experienced a downward trend in recordable incidents, with 2023 marking the safest year on record. During this time, the team assumed responsibility for DOT compliance and further enhanced the company’s safety culture.

Felsingers spent more than 30 years in corporate safety and human resources leadership roles, joining Wells in 2012. During her time, she successfully consolidated multiple regional approaches into one comprehensive safety process and introduced a behavioral-based mindset that focused on developing a measurable safety leadership program to enhance the organization’s culture.
